

The calving book designed by ranchers for ranchers!

Calving-Season Tools ...

The right tools are essential during calving season and a rancher's calving book is the guardian of vital information. The Red Angus Association of America's (RAAA) custom-designed calving book meets the demands of calving season, plus contains all the information ranchers need at their fingertips to genetic, age and source verify their calf crop.

The RAAA marketing team is again producing the official Red Angus Calving Book that will be available to producers by mid-December.

The book is a weather-proof, "Rite In The Rain" product that features a waterproof cover and All-Weather Writing paper created to shed water and enhance the written image. The book includes the management pages producers use like bull inventory and soundness, vaccination, treatment, herd health, breeding and pregnancy.

The pages will be customized for Red Angus data and ranchers can record over 500 calves per book.

Promote with a customized book:

Red Angus affiliates or RAAA members can customize their own calving book cover for their promotional needs. Just send your logo and wording to reflect your association or ranch name. We will design your cover and e-mail you a proof. The inside pages and company ads will be the same in each book.

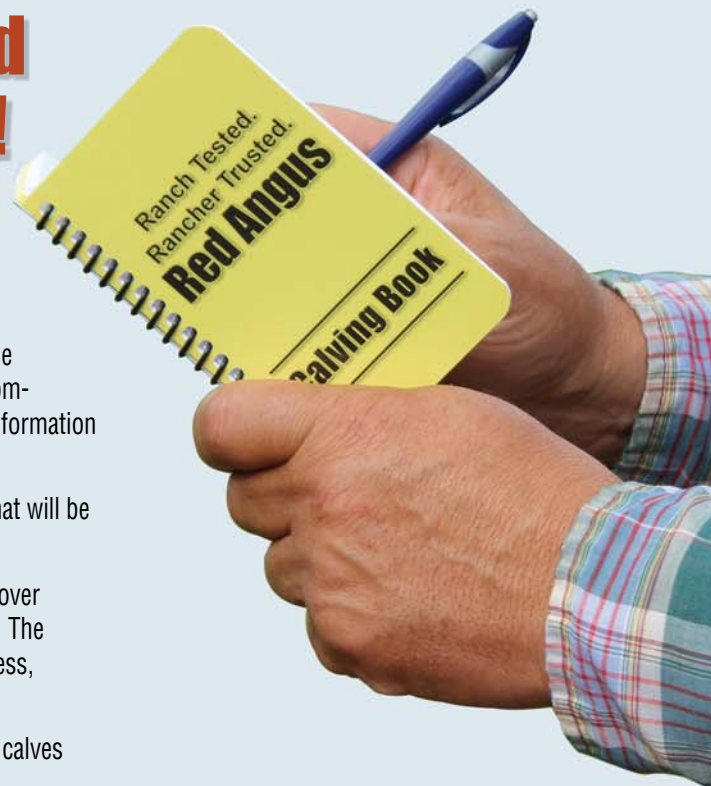

A minimal order of 250 customized calving books costs \$95 for the cover set-up fee, plus \$5.60/book printing costs. Shipping will be at the lowest-cost provider. Larger quantities are available in increments of 50 books.

The deadline to reserve your custom-cover Red Angus Calving Books and submit your half payment is August 26. The remaining balance can be billed to your account. The books are not date sensitive so they have a longer shelf life.

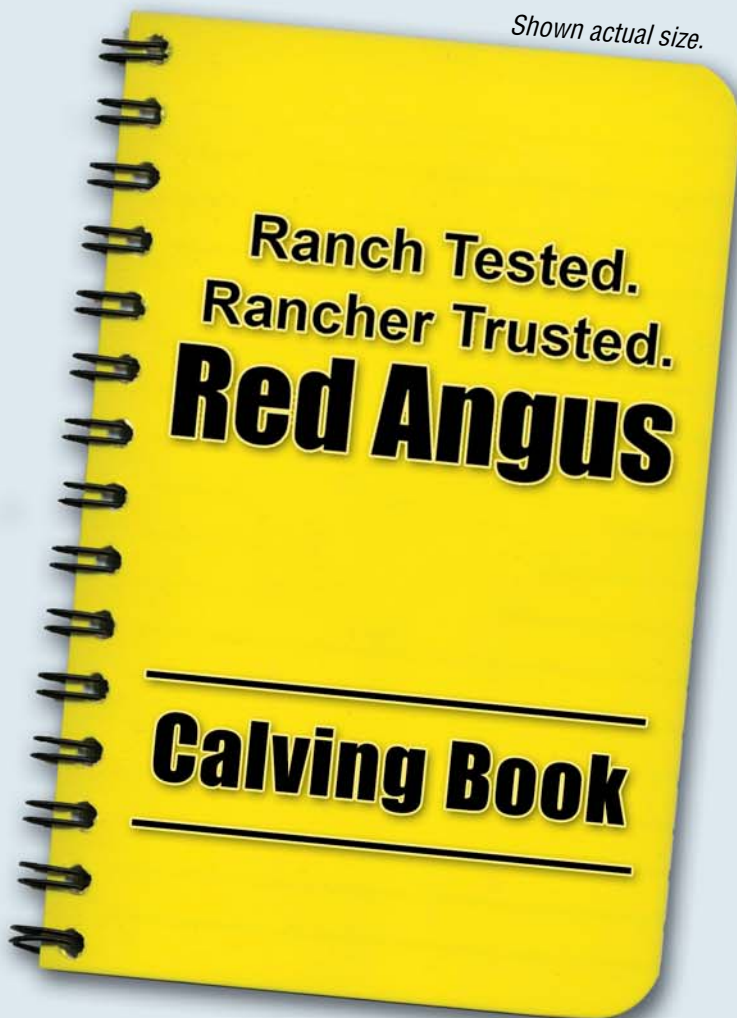

Reserve your customized Red Angus calving book:

Take a peek inside the calving book ...

Udder Scoring Suspension & Teat Size

Red Angus' two-score system allows for the separate evaluation of udder suspension and teat size.

Teat size scores are subjective assessments of teat length and circumference and range from 9 (very small) to 1 (very large).

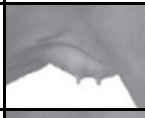

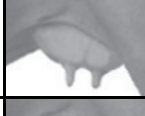

Udder Suspension

Score	Description	Example
9	Very tight.	
7	Tight.	
5	Intermediate/mc	
3	Pendulous.	
1	Very pendulot	

Use the following guidelines when collecting udder score data:

- Udder scores should be taken within 24 hours after calving.
- Use a cow's "weakest" quarter to score teat size and udder suspension.
- Age of the female should not be factored into her scores.
- It's best if the same person scores all females in each management group.

Teat Size

Score	Description	Example
9	Very small.	
7	Small.	

- Udder Scoring System descriptions and picture examples

- Space for over 500 calving records

- FCCP and Allied Access Enrollment Checklist
