5L TRADESMAN 1715-6237 (#1187423)

Tradesman is sired by 5L Tradition 203-6145 and is out of 5L Lakota 41C-1715. He sires cattle that have lots of shape and style with excellent fleshing ability. He balances the basics as well as any. He stamps his calves and his daughters are functional and adaptable with loads of dimension.

5L Ranch, Sheridan, Mont.

BROWN 3K STAKEHOLDER X7870 (#1379607)

Brown 3K Stakeholder X7870 is sired by the very popular Nebula P707 and out of an own daughter of the famous Abigrace cow at the R.A. Brown Ranch. Stakeholder offers you a great genetic package having low birth accompanied with high growth. He is truly an all-purpose sire. Look up his EPDs then let Brown 3K Stakeholder work for you.

3K Land and Cattle Co., Lewisville, Texas

BIEBER ROUGH RIDER 10712 (#1101852)

We are extremely excited about this sire. Rough Rider is backed by Bieber Adelle 8958 who is also the dam of Bieber Makin Hay 9913 and Bieber Outrider W388 (Select Sires). We have used this bull extensively. The progeny are moderate sized and exhibit thickness just like their sire with lots of muscle shape over the top. This bull hit what we think may be the sweet spot in EPDs. Canadian semen rights sold to Brylor and Bryan is fired up about his progeny in Canada. Semen is available through Bieber Red Angus in the U.S. and through Brylor Semen Sales in Canada.

Bieber Red Angus, Leola, S.D.

BUF CRK THE RIGHT KIND U199 (#1260155)

Right Kind is sired by Buf Crk Lancer R017 and out of a Buf Crk Julian L080 daughter. A truly impressive bull, and the best R017 son ever to sell. Extremely correct and attractive, he has a tremendous amount of muscle, a wide and powerful top line, large testicles and a wonderful disposition. His sons were the high-selling sire groups in the Loosli, Westphal and 5L (all co-owners) sales in the spring of 2012.

Buffalo Creek Red Angus, Leiter, Wyo.

CRS DIAMND FRANKLIN 988 (#1332701)

Owned with Hall Red Angus, Bartlett and Stapleton, Neb. Crs Diamnd Franklin 988 is a massive growth bull with impressive structure, style and eye appeal – all in a moderately framed package. His dam is a top producer with the feminine, yet bold-ribbed brood cow build and a beautiful udder. 988's first crop of calves have been top performers in the Cross Diamond herd. Look to this line for powerful, sound, easy-keeping, capacious cattle.

Cross Diamond Cattle Co., Bertrand, Neb.

J BAR VIRILE L6 514 (#1081433)

Virile is sired by Bieber Virile 7038 and is out of J Bar Posybell L6, a Glacier Logan daughter. Virile is doing an outstanding job making useful females at the J Bar Ranch.. He is CSS certified.

J Bar Ranch, Jeff Johnson, Eudora, Kan.

5L FAMILY TRADITION 464-138X (#1395593)

Family Tradition is a very balanced sire when studying his EPDs with the bonus of great carcass numbers, being in the top 1% of the breed for marbling. His low maintenance and stayability allow him to sire very useful daughters that will be contributors to the most scrutinizing program. Efficiency, longevity, carcass quality and outcross genetics all in a desirable phenotypic package sounds like ingredients for profit.

Horsley Red Angus and Arcadia Land and Cattle Co., Stringtown, Okla., Cross Diamond Cattle Co., Bertrand, Neb., and 5L Ranch, Sheridan, Mont.

JACOBSON SHOOTER 9055 (#1318493)

Shooter is sired by 5L Summit 1145-6327 and out of BT Top Rita O 07. He is particularly clean made and long topped. Shooter sires long-bodied, good-footed cattle. His heifer calves have that brood cow look — long females with angular fronts. His sons are one of our heaviest sire groups exhibiting lots of length – they are deep bodied and thick. We will use him hard in our own herd. His dam is a “never miss” cow that is in our donor pen.

Jacobson Red Angus, Hitterdal, Minn.

KOESTER CHIVAS 005 (#1415933)

Koester Chivas 005 sold in our 2012 sale to the “On the Rocks” Syndicate – Jacobson Red Angus, Sonstegard Red Angus, Wood V Bar X Ranch, Shepard Settlement Farm and Brackel Ridge Cattle Co. – for \$28,000. His first calf crop backs up his low birth EPD and his calves are showing his same powerful look at that age.

Koester Red Angus, Steele, N.D.

LELAND ODYSSEY Y290 (#1452347)

This Glacier Chateau 744 son is out of a 2-year-old heifer, Messmer Pandora W072, who was produced by Messmer Pandora M186 (the dam of Messmer Joshua O19P) and sired by LJC Mission Statement P27. Leland Odyssey Y290 sold in our production sale last year to Larson Red Angus, Shick Red Angus and Weber Red Angus for \$30,000. Knaub Red Angus currently also own an interest. He is a very interesting bull that could make some waves with a very moderate BW and exceptional growth. His dam has produced one of our very top bulls again this year with an 826 WW (118) sired by a Packer son.

Leland Red Angus, Sidney, Mont.

LCB GOLDRUBBER 1105P (#958125)

One of the most impressive EPD bulls of the breed, LCB Goldrobber 1105P is a strong member of the Semex line-up and from a tremendously strong cow family. His maternal grand dam, KRN Reba's Robin, is none other than the dam of Major League and Grand Canyon! If you like proven consistency, low birth weight, high growth and strong carcass EPDs, you will fall in love with the Goldrobber 1105P cattle. No where else on earth will you find as many direct daughters and progeny of this outstanding bull than at the Whitleys of Alabama.

Whitley Red Angus, Horton, Ala.

MLK CRK EXPRESS 9127 (#1309400)

9127 is sired by 5L Grand Express 435-5655 and out of Milk Crk Sheba 043, a BJR Proof 224-159 daughter. He was purchased in our 2012 sale by Ross Knott and Paul Birnie of Nebraska. We used the bull AI on heifers and cows and we think that you will appreciate the depth of body and fleshing ability of these moderate-framed, high performance heifers.

Milk Creek Reds, Plevna, Mont.

BECKTON EPIC R397 K (#1042135)

Beckton Epic was our pick of the Beckton 2006 sale offering. He is sired by Beckton Epic K F075 and out of a Julian B571 daughter. This sire offers pedigree flexibility and more and can be used across the entire herd. He is a curve bender deluxe: +10 CED, top 4% WW, top 3% YW EPDs. His calves exhibit excellent volume, muscle and solid growth. The paternal side of his pedigree is an outcross to nearly everything else in the breed. His progeny have performed above and beyond our expectations for weaning and yearling. His progeny have also produced some outstanding carcass ultrasound results. We are calving his daughters and are very pleased with their size and type.

Milk Creek Reds, Plevna, Mont.

BJR HIGH CAPACITY 008 (#74147)

BJR High Capacity is sired by BJR Hi Ho 916 and is out of JRA James 904. This dark red, thick-made bull is strong for growth with a WW EPD in the top 11%, YW EPD in the top 9% and a REA in the top 6%.

Shepard Settlement Farm, Marcellus, N.Y.

FOSTER'S WEST RIVER 47 (# 966112)

This bull is sired by Glacier Chateau 744 and out of Badlands Cedar 922 and was the second highest selling bull in our Red Western Sale at \$7850 going to Accelerated Genetics, Grill Cattle Co., Lazy B Ranch and Ballensky Red Angus. Chateau 744 x Red Tassel Chivalry 1G was a great match adding length, muscle and eye appeal.

Shepard Settlement Farm, Marcellus, N.Y.

STEADFAST BOAZ T71 (#1158668)

Boaz is a double-grandson of TR Julian LT142. LT142 semen is rare and some sold in the 2011 Bet On Red for \$1,200/straw. Boaz's dam was the high-selling open heifer at the 2006 Mushrush-Beckton Sale. Boaz combines calving ease and growth: CED in the top 5%, BW in top 8%, ME in top 17%, HPG in top 18%, CEM in top 13% and STAY in top 1% of the Red Angus breed. Boaz is OSF.

Steadfast Beef Genetics, Inman, Kan.

MUSHRUSH TROJAN X332 (#1421238)

Mushrush Trojan exemplifies our program at Mushrush Red Angus. A moderate, deep, easy-fleshing herd sire, he started out with below birth ratios and exploded with rapid early growth. He is stacked with proven, predictable genetics. Be the first to sample this exciting, young herd sire.

Mushrush Red Angus, Strong City, Kan.
