- FOR OFFICE USE ONLY -  
 REGISTRATION # FOR MULTIPLE SIRE GROUP

MEMBER # \_\_\_\_\_

## Multiple Sire Group

When registering a calf sired by a multiple sire group, please submit this form along with your registration application form. A different form must be completed for each multiple sire group.

- If a calf is produced by a multiple sire group, a list of all bulls in the multiple sire group and their registration numbers must accompany the calf's registration application on the proper form. Reporting of multiple sire groups aids in more accurate EPD calculation based on resulting progeny.
- The blood percentage of the lowest blood content bull in the multiple sire group will be used as the blood content for the sire of all calves in such a group.
- No calf sired by a multiple sire group – even though parents are 100% Red Angus – can exceed 99% Red Angus genetic lineage.

***For further information on Multiple sire Groups, please refer to the Red Angus Breeders Guide RR Section C.***
