

Bieber Fever XI!

November 10, 2016
1 pm at the Ranch
9 miles west of Leola, South Dakota

**The opportunity to
position your herd
for profit!**

A sample of the Offering...

600+ Females!

75+ Registered Bred Heifers!

We bred 420 heifers this past spring. This is your opportunity to buy bred heifers from the heart of the Bieber program. Bred to calve in January/February and May/June.

130+ Registered Red Angus Cows!

100 February/March/April calving and 50 May/June calving. A complete dispersal of all our 2009 cows, including donors like never before. The dams of Rollin Deep Y118 and Spartacus A193. Also Basin a Mission Statement daughter from the Laura cowline that we feel is equal to or greater than Hard Drive's dam who sold last year in Denver for \$30K!

400+ Commercial Red Angus Heifers!

These heifers are AI'd and come from some of our best customers. If you are looking for heifers, this will be an offering you have to see!

110 Coming Two-year-old Red Angus Bulls!

More Herd bull opportunities like last year's high seller Bieber Deep End B597, who sold to Genex. Our commitment to making sure you get the best opportunity for profit is second to none. These bulls are stout, good looking with great EPDs and a history of prepotency behind them. Sons of Hard Drive, Spartacus, Samurai, Roosevelt, Rollin Deep and Real McCoy. They include more ETs than we've ever offered in our fall offering.

Lot 2 BIEBER TILLY 233U

	CED	BW	WW	YW	MILK	ME	HPG	CEM	STAY	MARB	REA	FAT
EPD	2	-0.7	58	85	23	6	1	-3	12	0.73	0.38	0.02
% Rank	73	51	46	50	35	84	44	97	20	5	9	86

Tilly 233U comes from the same great cowline that originates from BJR TILLY 862-62. Ron bought a group of cows from Cliff Haugen in the fall of 1991 that were all 10-year-olds and really good cows. 2101 was her tag and she was the main foundation for our Tilly cowline of today. 233U is nine-years-old and was one of those cows that was open last year because we had her in our ET program. She is the dam of Bieber Spartacus A193 and has 35 calves to her credit via our ET program. We used Spartacus heavily in 2015 and 2016 and already have a couple of sons to sample, including this year's lead-off bull. It is not easy to let cows like this go, but we have been committed to moving forward with our younger genetics.
