

Bieber Fever XII!

BIEBER HARD DRIVE Y120

1436718

Hard Drive Y120 has seen very heavy use the past two years in our program. The replacement heifers we bred this past spring had a large representation of daughters sired by Hard Drive. Visitors to our ranch that look at the heifers this spring and summer have all noticed Hard Drive daughters. Comments have been outstanding and we are looking forward to calving the first very large group. The daughters we have calved to this point are spot on with great udders, adequate milk, and calve easily or come of grass in great shape. Hard Drive is no longer producing freezable semen so we have been sampling sons to take his place and move our program forward. We would be unwise if we didn't mention that the disposition on these Hard Drive progeny is excellent. Hard Drive data is hard to match. Semen is rare at this point. If you locate any you need to put it in your tank.

LOT 15 3536883

HARD DRIVE X 50 SHILLING Our goal had been to make sure that the consistency of the offering be solid from top to bottom. Our ET program makes it easier in 2 ways with more sons from great cows and more daughters of great cows.
